Signed document (pages 1-4)	`07b6fa460efe61fc6173833967f4620c0096d96b7d9055d3016c1a2366528844`

SHA-256 of the signed document PDF (every page with all signatures and field values applied) exactly as generated, BEFORE the certificate pages were appended. DocAutoSign stores that file, so the fingerprint can be re-checked at any time.

The complete file (signed pages + this certificate) has its own SHA-256, kept in DocAutoSign's records; a file can't contain its own fingerprint.
